

Context Diagram (Level 0 DFD)

One process, eight external entities, and every data flow between them. Notation: Gane & Sarson.

Reading the diagram: the upper arrow of each pair flows INTO the system, the lower arrow flows OUT of it. Related items are grouped on one arrow and separated by semicolons. No data stores appear at Level 0.

Context Diagram (Level 0 DFD)

Data flow table.

#	Source	Destination	Data flow	Contents
1	User	System	Sign-in data	Email and password; 2FA code or passkey.
2	User	System	Registration	Title, document type, priority, description, remarks, destination office(s), delivery mode; optional attachment (pdf/doc/docx/xls/xlsx/png/jpg, max 10 MB).
3	User	System	File version	A new version of the document file.
4	User	System	Comment	Comment text and internal flag; edits and deletions of own comments.
5	User	System	Search / filter	Control number, title, status, office, type, date range.
6	User	System	QR token	Token read from a label by camera, wedge scanner or manual entry.
7	User	System	Support ticket	Subject, message, contact details, optional screenshot.
8	User	System	Profile changes	Name, password, appearance, 2FA enable / disable, passkey registration.
9	System	User	Dashboard and lists	Role-based dashboard; document list with status and due state; details and movement trail.
10	System	User	Control number, QR label	OFFICE-YEAR-00001 and the printable label.
11	System	User	File download	Contents of a stored file version (download is logged).
12	System	User	Notifications	Assigned, forwarded, due soon, overdue; unread count.
13	System	User	Help and confirmation	Help articles, contact details, ticket confirmation.
14	Admin	System	Workflow action	Receive / forward / complete / archive / restore, destination office(s), remarks, expected leg id.
15	Admin	System	Signature	Drawn image or typed name plus password confirmation.
16	Admin	System	Report request	Filters and export format (PDF / XLSX / CSV).
17	Admin	System	Office settings	Office-level settings.
18	System	Admin	Office queue	Documents held by the office, counts by status and due state.
19	System	Admin	Confirmation	Result of the action and the updated trail.
20	System	Admin	Certificate PDF	Signature certificate with serial and hash.
21	System	Admin	Report export	PDF / XLSX / CSV file (row caps enforced).
22	System	Admin	Deadline notifications	Due soon and overdue notices for documents the office holds.
23	Super Admin	System	Account management	New account details, role, password reset, activate / deactivate.
24	Super Admin	System	Workflow settings	Allow or block self-approval.
25	Super Admin	System	Backup request	Run backup now; record that a backup was restored.
26	Super Admin	System	Verification request	Verify all signatures on demand.
27	System	Super Admin	System-wide views	Dashboard and reports across all offices; user list; temporary password.
28	System	Super Admin	Backup history	Run status, size, path, failures, restores.
29	System	Super Admin	Security event log	Logins, lockouts, role changes, downloads, signatures, backups.
30	Public Scanner	System	QR token	Token from a printed label.
31	Public Scanner	System	Signature serial	Serial from a certificate.
32	System	Public Scanner	Public status	Control number, status label, current office, last update.
33	System	Public Scanner	Verification result	Whether the signature is valid and who signed.

Context Diagram (Level 0 DFD)

Data flow table.

#	Source	Destination	Data flow	Contents
34	System	Public Scanner	Public pages	Help / FAQ pages, privacy notice.
35	Scheduler	System	Daily triggers	01:00 backup, 02:30 signature verification, 08:00 deadline sweep.
36	System	Scheduler	Job result	Exit status and log line.
37	System	Mail Server	Outgoing email	Email verification, password reset, support ticket (with optional screenshot).
38	Mail Server	System	Delivery status	Accepted / failed.
39	System	File Storage	Stored files	Document file versions, signature images, support screenshots.
40	File Storage	System	File contents	Bytes for download, hashing and backup.
41	System	Backup Storage	Backup archive	Database dump plus document files; oldest runs pruned (keep 14).
42	Backup Storage	System	Backup listing	Stored runs and sizes.
